

Proclip > Heavy gauge Stainless steel fastener with black oxide coating to better hide fastener between boards.

PRODUCT FEATURES & COMPATIBILITY

Proclip fasteners are constructed of .060 ¼ roll hardened stainless steel.

The Proclip was designed specifically for cellular PVC decking material. Proclip will work in the following decking lumber varieties:

AZEK

**** IMPORTANT NOTE: Proclip should NOT be used with composite decking.

Please consult your lumber professional or ask us for recommendations first if you plan to use any other type of decking for your project.

PRODUCT REQUIREMENTS

Proclip Fasteners are designed to work with Cellular PVC deck boards without outer shell. Be sure to use the correct fastener with your decking. When using PVC decking with outer shell the TC-3S fastener recommended.

When using Tiger Claw fasteners, be sure to carefully read installation instructions to obtain optimum results. Failure to properly follow instructions may result in void of warranty.

Inspect decking material prior to installation. Omit any planks that contain hooks, twists, splits, cracks, or other defects.

Be sure to follow decking manufacturer's recommendations for board spacing.

PRODUCT SPECIFICATIONS

Recommended Materials: Use only with cellular PVC decking no less than 1" in thickness.

Appearance: Semi glossy black finished, flat body with circular shaped hole along lower bend. Two sets of narrow opposing prongs on top. (Non-magnetic)

Dimensions: .50" H x 1.5" W x .9" D

Material: .060 304 ¼ roll hardened stainless steel - Yield strength 64.5 kpsi
Tensile strength 145.7 kpsi

Or

.060 201 ¼ roll hardened stainless steel - Yield strength: 75 kpsi
Tensile strength 125 kpsi.

Finish: Black oxide with Black wax topcoat

Workability: All work can be done quickly from above using basic tools (hammer, screw gun)

Gapping: Proclip will automatically create a 1/8" space between each board.

Expansion / Contraction: Fasteners are designed to allow decking to expand and contract naturally by sliding on the fastener prongs and still maintain hold down strength. Cellular PVC decking experiences very little expansion and contraction as temperatures change.

Recommended Screw Used: Quality Stainless steel # 7 x 1 5/8" (#1 square drive) trim head decking screws included in each box of Proclip.

Package Content:

Retailer Box: (90) Tiger Claw fasteners, (90) #7 x 1 5/8th" stainless steel screws, (1) installation block, (1) installation instruction, (1) support addendum, (1) #1 sq. drive bit.

Contractor Bucket: (1400) Tiger Claw fasteners, (1400) #7 x 1 5/8th" Stainless Steel Screws, (5) Installation Block, (2) Installation Instruction, (2) Support Addendum, (8) #1 sq. drive bit. (1) Increasing Profits Booklet, (1) Instructional DVD, (1) Tiger Flyer

COVERAGE

Coverage Estimator - A fastener is needed at every intersection of a joist and decking board. Using 5.5" decking with 16" on center joist:

90 pcs. box covers approx. 50 sq.ft.

1400 pcs. bucket cover approx. 750 sq.ft.

Or

Square footage x 1.75 = Number of Fasteners

For other configurations:

Decking boards x # Supports = # Fasteners. Fasteners / 90 = # Boxes (round up to next box)
